

◆ Upper Threads

POLY STAR becomes

POLY SPARKLE

Metallized Polyester Thread

A New Star has Risen!

Function meets glamour - POLY SPARKLE is hard-wearing and sparkling, because a polyester thread is twisted with a metallic thread. In many exciting color combinations, embroideries and decorative seams appear harmonious, subtle and yet very noble. The polyester component makes the thread hard-wearing and soft, the metallic thread lets POLY SPARKLE sparkle and glitter. All in all, the result is a wonderful effect thread with a whole new look.

GUNOLD[®]

POLY SPARKLE VEGAN

Processing Recommendations:

- ◆ **Needle:**
Use standard needle ORGAN No. 75/11 SES for this thread.
- ◆ **Bobbin Thread:**
Best results with BOBBY SYN 130 or BOBBY FIL 110L.
- ◆ Professional materials for high-quality embroidery and sewing results - tried and tested in the ready-to-wear, promotional and home textile sectors. Find out more at www.gunold.de

Care Instructions:

Technical Information:

- ◆ **Upper thread**
- ◆ **Composition:**
Metallized effect thread 78% Polyester, 22% Polyamide
- ◆ **Size 30:**
Nm 47 (3ply); dtex 210 (3ply)
(Note: 3 Threads = 3 ply)
- ◆ **Minimum order:**
1 Miniking cone of 1.000 m

Range of colours:

- discover all 54 colours:
- interactive at www.gunold.de
 - real thread colour card

Especially for patterning:

- all 54 colours on Miniking cones in 2 drawer boxes

Tip:

Digitize a lighter (30s) version for embroidery designs. Less density results in a more even embroidery image.
